Ball Horticultural Company

Zahara zinnia, a new disease-tolerant, heat-loving zinnia series, has 20 percent larger flowers in stronger colors than other Zinnia marylandica varieties. The series includes a triple play of the first Yellow, first Scarlet and the first well-balanced Mixture in a zinnia of this type. The four-color series showed such outstanding performance that it was chosen for use at the 2008 Olympic Games in Beijing. Once established in the ground, drought-tolerant Zahara has low water needs, making it ideal for areas with watering restrictions. **Contact Ball Horticultural Company, Reader Service Number 150**

Dosatron International

Whether you have a small or large greenhouse, the new Dustcart is an indis-

pensable tool. This portable chemical dispensing system not only gives the flexibility and mobility you need to fertilize or treat your plants at the point of application, but it also enables you to sanitize your greenhouse. Specially designed for Dosatron injectors, it can be used with 7, 11, 14 or 20 GPM units. All the great Dosatron benefits are there: non-electric, proportional, economical on-demand dispensing.

OHP, Inc.

OHP introduces the availability of its "Prescription Poinsettia Solutions PPSx," a detailed brochure containing valuable information on the use of plant growth regulators, insecticides and fungicides for producing an out-

standing poinsettia crop. **Contact OHP, Reader Service Number 152**

Flamingo Holland, Inc. USA

Adios Nonino is one of the newest additions of the Tango Lily collection. This variety features a unique large purple and black brush mark. Adios Nonino is bred for cut flower production. Forcing time is about 90 days, depending on the time of year and location. **Contact Flamingo Holland, Reader Service Number 153**

Terra Nova Nurseries, Inc.

Metallic Mist begonia earned a blue ribbon in the commercial grower category from the American Begonia Society. It also received a significant 96 out of 100 points rating in the field of "New Introduction from a

Commercial Grower." The plant, with its heavily silvered, maple like leaves, is a hybrid of two Chinese begonia species, and is hardy in USDA Zones 7b to 9.

Structural Plastics Corporation

Growers from Australia to Maine have discovered the plant-friendly nature of

Benchmaster All-Plastic Benching Systems. There are no metal parts to rust, no wooden parts to rot and no place for insects or fungus to find a home. Molded with the strongest commercially available UV resistance, these benches will serve your needs for years to come. **Contact Structural Plastics Corporation, Reader Service Number 155**

SMALLGIANTS

We're looking for our next set of small giants—products that choose to be great instead of big. Send us your product: ahikkila@ballpublishing.com
