

Growing Recipe

AGASTACHE 'MORELLO'

Approximate Finish Time From Liner

□ = Minimum □ = Maximum

pH: 5.5 - 6.5

Fertilization Recommendations: 100 - 150 PPM

EC: 1.5 - 2.0

Light Levels: Full sun

Water Requirements: Dry moderately between waterings

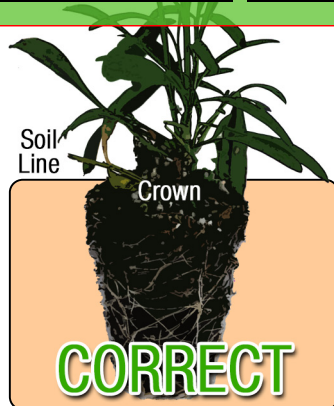

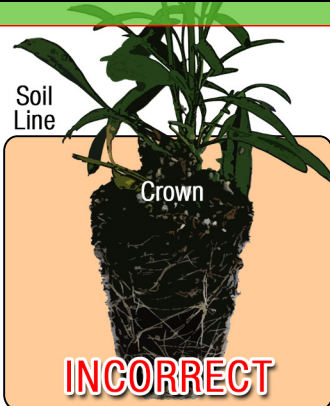

Hardiness Zones: 5 - 10

Possible Problems: Insect: Spider mites and white fly are possible

Habit: Upright, clumping

Diseases: None seen. Naturally resistant to downy mildew.

Day Length for Flowering: Long day

Do NOT bury the crown of the plug

Description

Amazingly huge, dense inflorescences of deep burgundy rose that bloom from spring through fall. Showy, dark foliage in cool temperatures extend the beauty. 'Morello' has a strongly upright habit that forms multiple crowns quickly. Good mildew tolerance. Loved by bees and hummingbirds.
