Possible Problems: Insect: Spider mites and white fly are possible

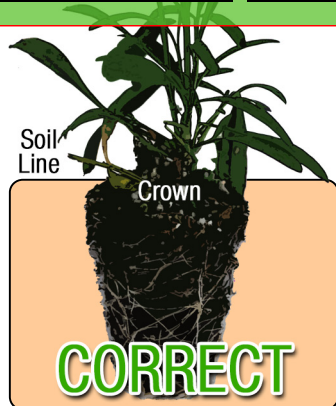

Habit: Compact & bushy

Diseases: None seen. Naturally resistant to downy mildew.

Day Length for Flowering: Long day

Do NOT bury the crown of the plug

Description

The showy, large spikes of bright lavender pink flowers glow over bright green foliage from summer to fall. POQUITO® 'Lavender' has a dwarf, bushy habit that performs equally well in the sunny border, container, or mixed bed. Enjoyed by pollinators. Drought tolerant once established.
