| Day Length for Flowering: Day neutral | | |

Do NOT bury the crown of the plug

Description

Another plant in the great COOL BREEZE™ Series, this very vigorous selection shows well; spring, summer outside, and especially in winter indoors. An elegant house plant, it appreciates a cooler home and isn't stunted by coolness, like the older begonias. It grows as a very round mound, perfect for a manicured patio pot, or as a neat garden plant. The leaves are very similar to its siblings, rounded, ruffled and possessing a red back.
