Hardiness Zones: 8 - 11	Possible Problems: <u>Insect</u> : Aphids and thrips <u>Diseases</u> : Bacterial, fungal	
Habit: Shrubby mound		
Day Length for Flowering: Day neutral		

Do NOT bury the crown of the plug

Description

'Cool Breeze Rouge' is a sister to 'Cool Breeze Pewter' and is more of a show-off. They are similar in youth, but 'Rouge' soon goes her own way by taking on a beautiful port wine glaze over her leaves as the heat climbs. The leaves of 'Rouge' are slightly more rounded than those of 'Pewter', but they are an even match in culture and care. Both are easy, will take heat and humidity, but are quite tolerant of cool weather too.
