Water Requirements: Dry slightly between waterings

Hardiness Zones: 10 - 11

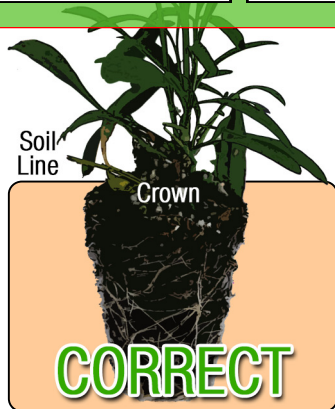

Possible Problems: Insect: Mealy bug if exposed
Diseases: Powdery mildew is possible

Habit: Rhizomatous, mounding

Day Length for Flowering: Day neutral

Do NOT bury the crown of the plug

Description

More tolerant of cold than most begonias, this one sports bright chartreuse leaves that are heavily edged in dark red. The borders are also ruffled and the leaf bases swirl like a ram's horn toward the leaf center. White flowers. Great as a patio plant or as a houseplant, easier to grow than a Rex. This plant did especially well in our display gardens in amended garden soil.
