Possible Problems: Insect: Aphids are possible
Diseases: Plants seldom experience diseases

Habit: Mounding

Day Length for Flowering: Long day

Do NOT bury the crown of the plug

Description

After viewing the photo from Belarus of Alexander holding his arms around this big Brunnera, we were sold! These gigantic plants have heavily silvered leaves and make a dramatic statement in the landscape or use as a dynamic specimen in a container. Lovely spiraled leaf-bases. This is not a hybrid of Brunnera 'Jack Frost'.
