Do NOT bury the crown of the plug

Description

Absolutely one of the most pure, true white flowers we've seen in ages. The floral display of this Dicentra is stunning against the soft blue-green foliage. Exceptional vigor and easy culture make this new Bleeding Heart a garden essential. AMORE™ 'Titanium' arose as a spontaneous mutation of the popular AMORE™ 'Pink' and it's a knockout. As with all the AMORE™'s, they are very heat resistant and flower for many months, spring through summer. Grow AMORE™ 'Titanium' in the sun, or for an elegant woodlander, in the shade.
