Do NOT bury the crown of the plug

## Description

This glowing ball of butter-yellow with a deep emerald-green eye is perhaps the best pot crop type Echinacea TERRA NOVA® Nurseries has bred. So many flowers over so many months, in greenhouses and out have made a whole new plant class within Echinacea's. Great garden performance gives value as a landscape plant, too. Dark green foliage, sunny yellow flowers and plenty of flower power make this a worthy addition to a professional nursery line up.
