

Growing Recipe

ECHINACEA 'MILKSHAKE'

Approximate Finish Time From Liner

 = Minimum  = Maximum

pH: 5.8 - 7.3

Fertilization Recommendations: 75 - 100 PPM

EC: 0.7

Light Levels: Full sun

Water Requirements: Dry moderately between waterings

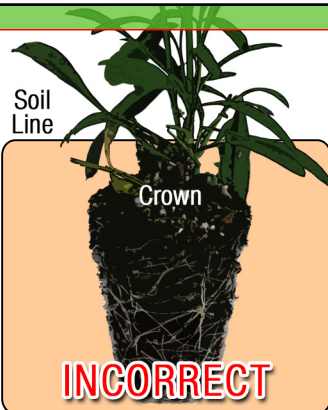

Hardiness Zones: 4 - 10

Possible Problems: Insect: Watch for aphids, mites, thrips, whitefly and slugs

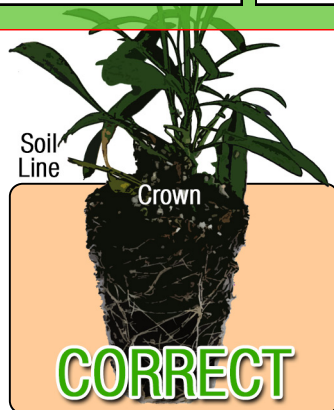

Habit: Clumping, upright

Diseases: The plants can have leaf spot and crown rot if kept too moist

Day Length for Flowering: Long day

Do NOT bury the crown of the plug

Description

A floriferous coneflower and a great addition to the landscape. Fully double pompom-like flowers have striking yellow centers when young. The centers fade to white with maturity creating some all white flowers and some yellow centered flowers all on the same plant. Strong, well-branched plants. Flowers from mid-summer to fall.
