

Growing Recipe

MUKDENIA 'CRIMSON FANS'

Approximate Finish Time From Liner

☐ = Minimum ☐ = Maximum

pH: 5.6 - 6.9

Fertilization Recommendations: 150 - 200 PPM

EC: 0.5 - 1.0

Light Levels: Shade to part shade

Water Requirements: Dry slightly between waterings

Hardiness Zones: 4 - 9

Possible Problems: Insect: No major problems

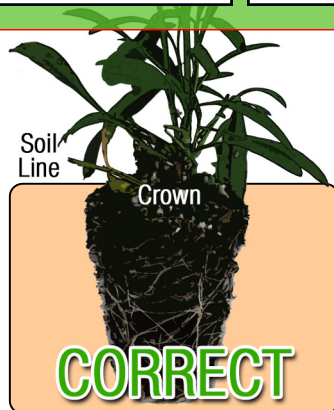

Diseases: No major problems

Habit: Rhizomatous

Day Length for Flowering: Long Day

Do NOT bury the crown of the plug

Description

Mukdenia is a very hardy, deciduous Heuchera relative from China. This form has large maple-like leaves, which emerge green then age (after flowering) to mid-green splashed with bright red. Foliage remains red all summer. Numerous white, bell-shaped flowers are held in branched panicles for several weeks from February to April. Can be used as a groundcover or specimen in part shade. This stunning plant is actually hardy in Vermont! Likes even moisture, and remember it is not as fast growing as a Heuchera. Compared to M. 'Karasuba' it is darker and more compact.
