Habit: Mat		
Day Length for Flowering: Long day		

Do NOT bury the crown of the plug

### Description

An incredibly clean and crisp new catmint that blooms early while continuing to look tidy long into the season. Bright lavender purple blooms make this a fantastic pollinator attractor, a top favorite of bees and butterflies. Distinctive small foliage has a sweet scent and looks great when used as a groundcover, on edges or in containers. Works well in a hanging basket!
