Possible Problems: Insect: No major problems

Habit: Upright, clumping

Diseases: Crown rot if over watered or over mulched

Day Length for Flowering: Facultative long day

Do NOT bury the crown of the plug

Description

A fabulous new look in Penstemon! Clouds of violet-blue, float at the top half of the neat, upright plant. So nice for a garden or container work. The medium small flowers are great pollinator attractors and continue for months. It's a very long time since an entirely new type of Penstemon has been introduced! This is it!
