EC: 1.0 - 2.0

Light Levels: Full sun to afternoon shade

Water Requirements: Dry moderately between waterings

Hardiness Zones: 6 - 9

Possible Problems: Insect: No major
Diseases: No major problems

Habit: Upright, clumping

Day Length for Flowering: Long day

Description

This Persicaria has much larger velvety leaves, taller, and showier than 'Lance Corporal'. It's also later blooming. (in November!-so seeding is hardly a problem). Tiny red flowers. Because of it's stature, it's a great back or mid-border plant. This plant is not a sprawler like so many Persicaria.

Do NOT bury the crown of the plug
