Habit: Mounding	<u>Diseases</u> : Pythium, Rhizoctonia and Botrytis	
Day Length for Flowering: Short day		

Do NOT bury the crown of the plug

Description

'Starlet' is TERRA NOVA®'s most exciting Plectranthus to date. Beyond having the most perfect, natural semi-dwarf habit, that doesn't require pinching and PGRs, 'Starlet' has a never before seen color that lights up a summer and fall garden like nothing else. Tones of bright rose, pure pink and violet are layer upon each other giving a stunning effect. Trusses of tubular flowers are held perfectly above the foliage and never look stretchy.
