

Growing Recipe

POLEMONIUM 'HURRICANE RIDGE'

Approximate Finish Time From Liner

□ = Minimum □ = Maximum

pH: 5.6 - 6.8

Fertilization Recommendations: 150 - 200 PPM

EC: --

Light Levels: Full sun to full shade

Water Requirements: Dry slightly between waterings

Hardiness Zones: 4 - 9

Possible Problems: Insect: Slugs and snails or aphids possible

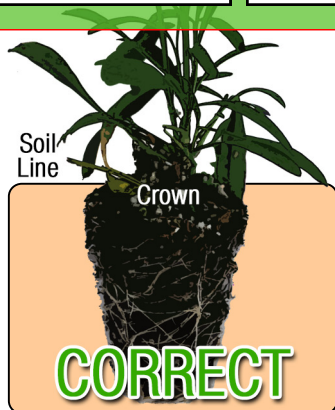

Diseases: Powdery mildew

Habit: Clumping mound

Day Length for Flowering: Long day

Do NOT bury the crown of the plug

Description

Foliage favorite for the garden with many improvements. Polemonium 'Hurricane Ridge' is named for one of the truest bluest views of the Olympic mountains in Washington State, where this nativar originates. It is a tough, hardy perennial that tolerates both sun and shade well. Repeating curved frond-like foliage has an attractive geometric element that is pleasing to the eye throughout its growth. Light lilac-blue toned flowers grace the top of the crisp green leafed cyclone mid-summer. Great for containers, added foliage texture and mixed sun/shade locations.
