Possible Problems: Insect: Mites are possible
Diseases: More mildew resistant than most varieties, but it could be a problem in shady sites

Habit: Low, spreading mound

Day Length for Flowering: Day neutral

Do NOT bury the crown of the plug

Description

Stands out from other Veronica in three main ways: 1) great garden performance, 2) intermediate plant size, not too small or too big, and 3) mildew resistant foliage. In addition it has lovely purple blue flowers in narrow spikes, excellent branching, a dense compact spreading habit, and excellent vigor.
